# Youssef Yasser Ismail

## Software Engineer | Full-Stack Applications

Cairo, Egypt • +20 120 378 5127 • youseef.ali.2002@gmail.com

Portfolio / GitHub / Look case study

### PROFILE

Software engineer with 3 years of experience building web applications, REST APIs, and data workflows. Recent work includes an operations platform with role-based access, real-time dispatch, fleet records, and financial reporting. Also builds mobile apps and desktop automation tools.

### TECHNICAL SKILLS

**Backend:** Node.js, NestJS, TypeScript, REST APIs, JWT authentication, role-based authorization, Socket.IO

**Data:** Prisma, SQLite, MySQL, relational modeling, transactions, validation, Excel exports

**Frontend:** React, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Vite

**Mobile and delivery:** React Native, PWAs, Git, GitHub, npm, Playwright, Cloudflare Tunnel

### SELECTED PROJECTS

**Look Operations Platform | Full-stack web & PWA**

Built role-based workflows for trip requests, dispatch, and approvals using React, NestJS, Prisma, and SQLite. Implemented real-time status updates, vehicle odometer records, attendance and overtime review, and Excel reports. Used isolated end-to-end tests to verify access and workflow transitions. View screenshots

**Zad Al-Qulub | Mobile**

Built a mobile application centered on Quran content.

**Desktop Automation & WhatsApp Bots**

Built a WhatsApp order workflow that prepares requests for approval and automates fulfillment steps in a desktop application. Watch demo

**Movie Discovery | Web**

Integrated the TMDB API with Fetch and async/await to retrieve and display movie data.

### TRAINING & LANGUAGES

**Elzero Web School:** 500+ hours of self-directed study in HTML, CSS, and JavaScript.

**Arabic:** Native • **English:** Technical working proficiency
